

## “Alt Key” Browser Tricks – Internet Explorer or Firefox

This tip can be really helpful or just kind of fun to know.

If you’ve spent time browsing through various sites and want to go back or forward using the keyboard, simply hold down the **Alt** key and use the arrows on your keyboard. Using **Alt plus the left facing arrow** will take you to the previous page, and **Alt plus the right arrow** will take you forward to the next page.

Pressing the **Alt key** with the **Home** key will immediately take you to your home page.
