

Diagram Templates

In Microsoft Visio 2007 there are eight different template categories and more than 50 different diagram templates to choose from.

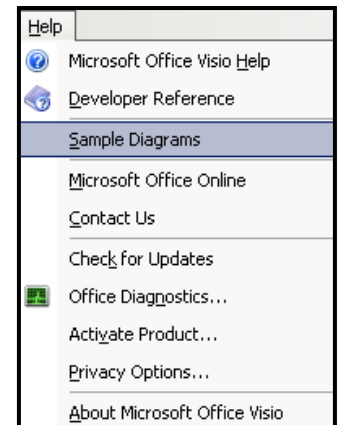

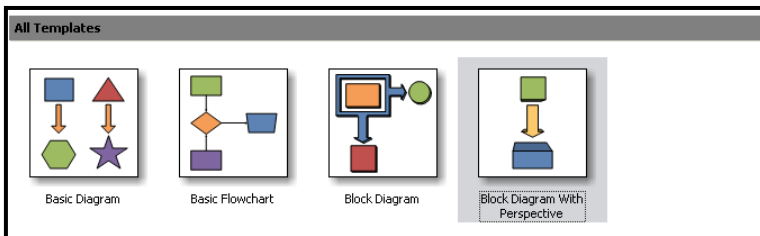

- General
- Business
- Maps and Floor Plans
- Schedule
- Software and Database
- Network
- Flowchart
- Engineering

A template will provide you with everything you need to create a specific type of drawing. Each template comes with a custom set of stencils, shapes, and menus specific to the diagram you want to create.

The templates can be accessed by going to the “**H**elp” menu and selecting “**S**ample Diagrams”.

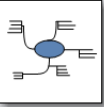

Template Categories

General: The general category is a place to create simple flowcharts and diagrams. This would be a good place for a new user to start when first learning how to use the program.

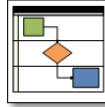

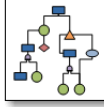

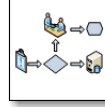

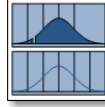

Business: The templates in this category can assist in organizing the different aspects of business from an organizational structure to financial statistics. Visio offers featured templates in this category as well as other available templates are shown below.

Featured Templates

		
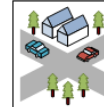

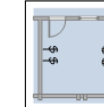

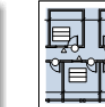

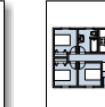

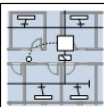

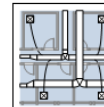

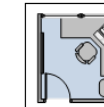

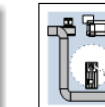

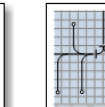

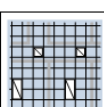

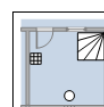

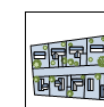

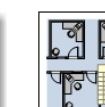

Brainstorming Diagram	Organization Chart	PivotDiagram

Other Templates

				
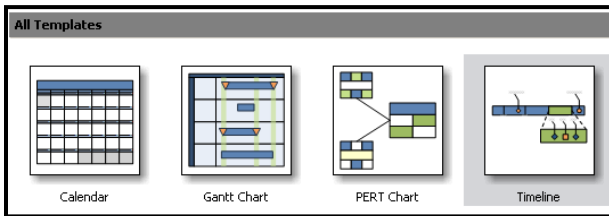

Audit Diagram	Basic Flowchart	Cause and Effect Diagram	Charts and Graphs	Cross Functional Flowchart
				
Data Flow Diagram	EPC Diagram	Fault Tree Analysis Diagram	ITIL Diagram	Marketing Charts and Diagrams
				
Organization Chart Wizard	TQM Diagram	Value Stream Map	Work Flow Diagram	

Maps and Floor Plans: These templates can be used to create floor and building plans as well as assemble directional maps, etc.

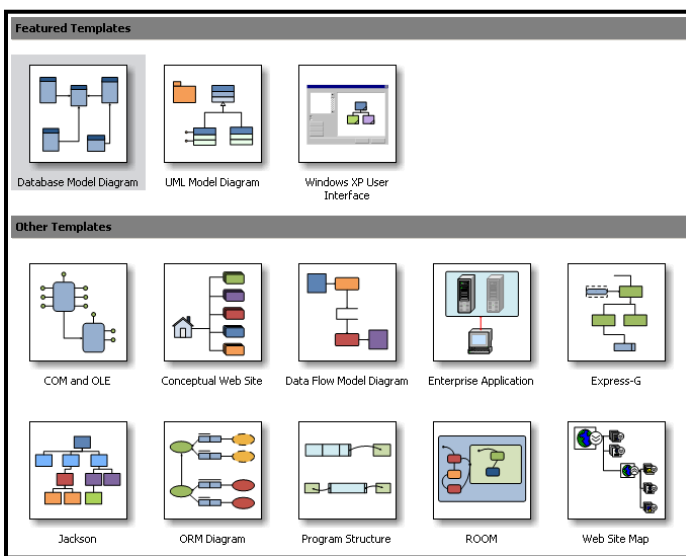

All Templates

				
Directional Map	Directional Map 3D	Electrical and Telecom Plan	Floor Plan	Home Plan
				
HVAC Control Logic Diagram	HVAC Plan	Office Layout	Plant Layout	Plumbing and Piping Plan
				
Reflected Ceiling Plan	Security and Access Plan	Site Plan	Space Plan	

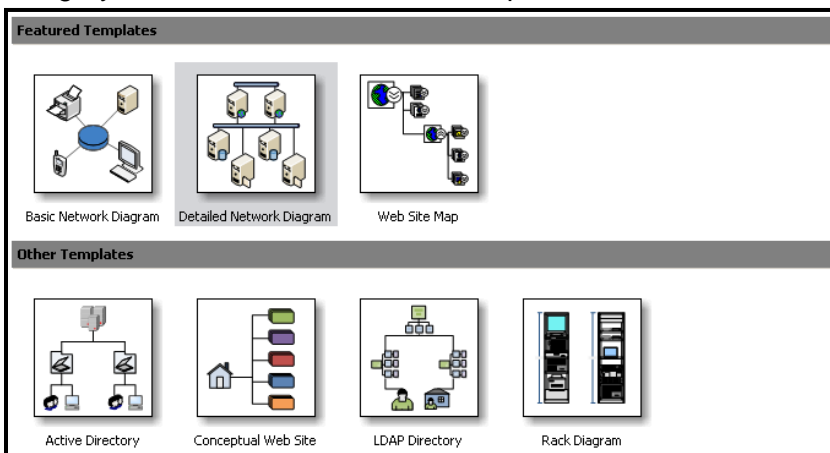

Schedule: The schedule templates offer different calendar formats, gantt charts for project management, timelines, and milestones, etc.

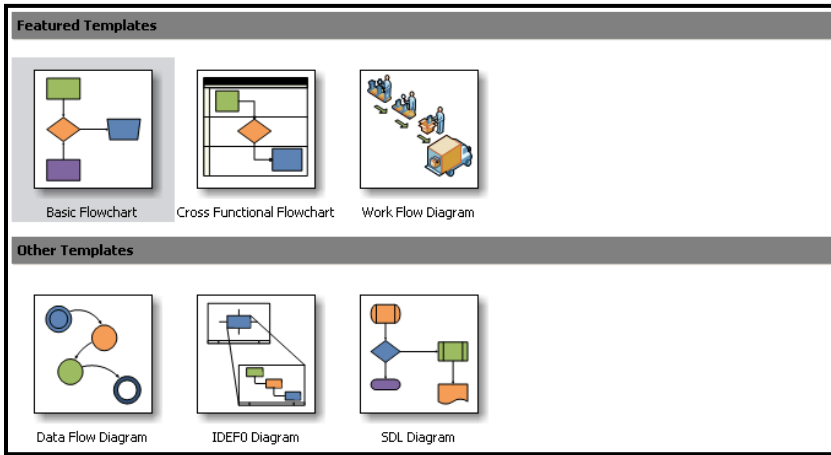

Software and Database: The software and database templates can assist with designing software structures and systems as well as databases. Visio offers featured templates in this category as well as other available templates shown below.

Network: These templates assist in creating simple network designs and network architectural diagrams using a comprehensive set of network and computer equipment shapes. Visio offers featured templates in this category as well as other available templates shown below.

Flowchart: Flowcharts are a visual representation of a process using connectors and links. Visio offers templates from basic to cross functional to data flow diagrams.

Engineering: The engineering templates help create schematic, one-line, and wiring diagrams and blueprints. You can use shapes for switches, relays, transmission paths, tubes, etc.
